

Instructions: Kennel Jacket

Installation

Your Kennel Jacket fits kennels with or without wheels.

1. Stand your empty kennel on end with the door side down. If possible, remove the wheels.
2. Unzip the front door of your Kennel Jacket, put the door opening over the back end of your kennel and slip the jacket down over your kennel. Be sure that the wheel openings on your Kennel Jacket have cleared the wheels. Replace the wheels if you removed them.

Using your Kennel Jacket

The door and both windows can be held open

by rolling them up and snapping the two straps at the top around the rolled up fabric.

Safety

ALWAYS leave at least a slight opening in both windows or the door so that your dog has adequate air and ventilation.

NEVER leave your dog unattended in your kennel. Even on overcast days the temperature can build up surprisingly fast inside the kennel.

Your Kennel Jacket is highly water resistant but no fabric is completely water proof. Check your dog in sustained wet conditions.

Please be sure that your dog has adequate water and food while inside the kennel.

The handle on your jacket is not designed to bear the weight of moving a kennel with a dog inside the kennel.

Care

Hand wash or machine wash on gentle cycle in COLD water. DO NOT USE SOAP as it can damage the protective coatings on the fabric. Line dry or machine dry on air or delicate.

Do not store your Kennel Jacket in an enclosed area when it is wet—it could mildew.
